

# DATA SECURITY ASSESSMENT

Our Data Security Assessment reveals the risks, blind spots, and access exposures in your data environment to strengthen governance and protect what matters most.

## IN 4 WEEKS...

- ✓ Maturity scoreboard assessing your current data security posture
- ✓ Analysis of where sensitive data lives, how it's accessed, and where exposure risks exist
- ✓ Remediation roadmap with prioritized actions and a guided workshop to close gaps, strengthen governance, and overall data security maturity

## UNDERSTAND WHERE YOUR DATA IS EXPOSED

### 1 Consult

We meet with key stakeholders to clarify data protection goals, compliance needs, and priority concerns, mapping data flows to identify high-risk areas.

### 2 Access & Analyze

Combining automated scanning and human validation, we assess how data is classified, accessed, and governed, benchmarking your environment and prioritizing gaps for action.

### ▶ Insights

Receive a data-driven report with key findings, maturity scoring, and a focused remediation roadmap. We guide your team through the results and translate the insights into practical next steps.

## ELEVATE VISIBILITY, GOVERNANCE, AND CONTROL

### Close Visibility Gaps

Identify where sensitive data lives, how it moves, and who has access to it. Discovery tools and expert validation eliminate blind spots and strengthen governance at the foundation.

### Ease Compliance Pressure

Evaluate data classification, retention, and sharing practices against leading privacy frameworks. We translate complex compliance requirements into clear, actionable steps that simplify audits and reduce regulatory risk.

### Secure AI & Collaboration

Address risks related to data sharing, unmanaged access, and AI enablement. Establish guardrails for collaboration platforms so teams can innovate safely without compromising control or compliance.

**SECURE YOUR DATA.**

Take the next step toward true data security.
