

MICROSOFT FABRIC

ASSESSMENT

Our Microsoft Fabric Assessment help organizations evaluate their current data infrastructure, BI tools, and reporting needs in preparation for adopting Microsoft Fabric.

IN 4 WEEKS...

- ✓ Assessment of how Microsoft Fabric can modernize and unify your data and analytics landscape
- ✓ Recommendations to strengthen your data platform, improve governance, and accelerate analytics modernization
- ✓ Prioritized adoption roadmap with a step-by-step plan to move from current state to Fabric readiness

PREPARE YOUR DATA FOR AI AT SCALE

1 Consult

We meet with your stakeholders to confirm analytics objectives, reporting needs, and strategic priorities, ensuring the assessment is tailored to your data and business goals.

2 Analyze

Our experts review your architecture, governance, licensing, and analytics workflows while mapping high-value use cases, culminating in a clear readiness scorecard.

► Insights

We guide your team through a prioritized Fabric deployment plan, licensing optimization opportunities, and next steps for Copilot and AI-powered analytics.

UNLOCK ENTERPRISE-GRADE AI READINESS

Modernize Your Analytics

Through a comprehensive review of your data platform and reporting workflows, we deliver a tailored modernization roadmap that accelerates performance, improves agility, and prepares your analytics environment for future growth.

Build an AI Ready Foundation

Ensure your data estate is structured, governed, and fully compatible with Microsoft Fabric so you can unlock Copilot, AI-driven insights, and automation.

Strengthen Security

Gain actionable recommendations to modernize analytics while safeguarding sensitive information, enforcing consistent governance, and enabling secure, trusted decision-making.

BECOME AI-READY.

Expert support to turn AI ambition into reality.
