

COPILOT READINESS

ASSESSMENT

Our Copilot Readiness Assessment helps organizations prepare for a secure and effective rollout to accelerate Copilot adoption.

IN 3 WEEKS...

- ✓ Security & compliance gap report outlining risks and required actions
- ✓ Copilot deployment roadmap detailing rollout priorities and timing
- ✓ Executive insight package with heatmaps that highlight readiness and impact

THE EASIEST WAY TO GET AI RIGHT

1 Consult

Our Copilot specialists lead a strategic kickoff to clarify your objectives, define success, and understand how Copilot can deliver value across your organization.

2 Analyze

We combine discovery workshops with a detailed review of your Microsoft 365, security posture, governance controls, and user landscape to surface risks, blockers, and high-value opportunities.

► Insights

We present prioritized recommendations, a tailored adoption roadmap, and executive insights – then consult with your team to plan next steps with confidence.

MOVE AHEAD WITH CLARITY AND CONTROL

Accelerate Adoption

We help you move fast and while staying in control through structured readiness checks, configuration validation, and tailored enablement workshops – ensuring your users are productive and secure from day one.

Reduce Security Risk

We identify configuration gaps, permissions risks, and data exposure issues across your Microsoft 365 environment, then outline a plan of actions that reduce risk and establish a secure, compliant foundation for Copilot.

Maximize Your ROI

Our in-house experts map Copilot capabilities to your real business workflows and KPIs, helping you navigate investment decisions and prioritize use cases that drive measurable impact and ROI.

UNLOCK AI POWER.
