THE ANATOMY OF AN M365 BREACH

PRESENTED BY  CoreView

**Are you
Protecting Your
M365 Tenant?**

Your Microsoft Tenant is both the water (data) and the glass (configurations)

Configuration tampering means that both are under threat during cyber incidents

The state of Microsoft 365 Backup

96%

...of respondents have their
Microsoft 365 data
backed up or are working on it

18%

...of respondents have their
Microsoft 365 configurations
backed up

Dangerous Assumptions...

49%

Believe that Microsoft is backing up their configurations

23%

Believe that their data backup vendors are covering this

18%

Have an internal process to backup their configurations

13%

Are currently not doing anything to backup their configurations

But who REALLY care?

What M365 services do you use?

How many configurations do you have?

How many tenants do you have?

Attackers know you can't detect configuration drift in Microsoft 365

...that's why its surging

#01

Configuration Drift is rated as the #01 cloud security threat in H1 2025 (CybersecurityHQ)

176k

176,000 instances of configuration tampering during 1 month (Microsoft)

79%

79% increase in configuration tampering of Defender across a 2-year period (Sophos X-Ops)

Top 1%

T-1562 "Impair Defenses" ranked in top 1% of MITRE attack techniques used by attackers (PICUS)

40%

Ransomware is 40% more effective when Entra is misconfigured (Microsoft)

70%

Device compromise increases by 70% when Intune is misconfigured (Microsoft)

CoreView: Microsoft 365 Tenant and Operational Resilience

1

Harden your Tenants Configurations

- Align tenant configurations to CIS controls
- Align configurations across tenants
- Detect high risk access

2

Detect Configuration Tampering

- Detect tampering across 8000+ policy details
- Detect 100+ tenant threats
- Detect new Entra apps

3

Restore Tenant Configurations

- Backup and Recover critical M365 tenant configurations
- Restore tenant configs in minutes not weeks

4

Secure Tenant Administration

- True Zero Trust Admin
- Segment tenant management
- Delegate “just enough” access
- Remove M365 privileged accounts entirely

5

Build Operational Resilience

- M365 Governance
- Simplified management
- Automate admin processes
- Rapid user troubleshooting

Anticipate

Withstand

Recover

*By deploying CoreView, enterprises gain **robust tenant resilience** and compliance solutions that **strengthen their security posture***
