Azure Migration Assessment

- ✓ **analysis** of migration readiness for on-premises or cloud infrastructure, including workloads, applications, and databases
- ✓ **unbiased** guidance on the right cloud provider to suit your workloads
- ✓ **advice** from Cloud Architects on migration strategy and ongoing cost optimization

In as little as
7 days
with no disruption

Accelerate your journey to Azure

Cost optimization

Evaluate the costs of Azure against all major public and private cloud providers, and gain insights for right-sizing resources to achieve efficient allocation and cost management.

Readiness evaluation

We evaluate readiness by testing server migration capabilities, identifying dependencies, and assessing compatibility with Azure, and provide actionable insights on areas to address.

Migration prep

We provide a detailed migration plan outlining each phase, including prioritized workloads, data transfer, and application setup, with clear timelines and milestones to minimize impact.

Discover your best path in just 2 steps

1

Consult | 30 min

Connect with our Microsoft Azure expert to align the assessment to your goals.

2

Deploy | 30 min

We'll guide you through installing a tool that collects metrics that our team will analyze to understand current workloads and build and test scenarios.

Insights

We'll provide an accurate cost comparison for cloud options, demonstrate Azure functionality, offer recommendations for migration readiness, and present a tailored migration plan.
