# Datacenter Assessment

- ✓ **200+** metrics and **6+** simulators
- ✓ **invaluable** insights into virtualization, storage, server utilization, and workloads
- ✓ **actionable** opportunities to optimize your infrastructure, right-size your environment, and potentially reduce license costs

In as little as  
**7 days**  
with no disruption

## Accelerate and improve IT decision making

### Modernize environment

Assess upgrades and opportunities for infrastructure consolidation to right-size your environment and reduce downtime, improve performance and identify compliance gaps.

### Evaluate cloud options

Compare scenarios across all major public and hybrid clouds options. See costs and other considerations in a single quantifiable analysis. Inform and accelerate datacenter decisions.

### Optimize VMware

Evaluate your VMware environment to assess license usage, performance and identify bottlenecks. Reduce costs and eliminate over-provisioning to maximize efficiency.

## Unlock insights in just 2 steps

### 1 Consult | 30 min

Connect with our Data Center expert to align the assessment to your goals.

### 2 Deploy | 30 min

We'll set up the HPE Cloud Physics tool to analyze 200+ metrics across VMs, hosts, data stores, and networks.

### > Insights

Our experts will guide you through the results, pinpointing opportunities for immediate optimization and long-term strategic alignment with your business objectives.
