M365 Security Assessment

- ✓ **120+** M365 security datapoints reviewed
- ✓ **insightful** report card comparing your security practices with industry best practices and US Government Agency Standards.
- ✓ **actionable** guidance on how to address identified security gaps, with prioritized remediation steps to strengthen your defenses

Microsoft

In as little as
10 days

Proactive M365 security for every starting point

For long-time M365 users

Frequent Microsoft updates can leave you with outdated settings like legacy authentication, increasing your risk. We will help discover and address these risks.

For new M365 users

Default M365 settings can expose you to external risks. Our experienced M365 security expert will pinpoint vulnerabilities, so you can strengthen your security from the start.

For new Microsoft Admins

Inherited settings from previous admins can pose hidden risks. Our assessment provides a point-in-time analysis to uncover and address these vulnerabilities.

Fortify your M365 in just 2 steps

1

Consult | 30 min

Meet with our M365 security experts to discuss the assessment findings and ensure they align with your specific security goals and objectives.

2

Deploy

We will send a secure, temporary access request to your Microsoft environment to run a metrics collection tool over a 7+ day period.

Insights

Our experts will walk you through a comprehensive report card, scoring your M365 security posture, outlining necessary remediation actions, and helping you strategize a clear roadmap to address any gaps.
